September 18, 2014

Dear Bethel Park Parent/Guardian:

After sending out my letter to you this afternoon, I received a telephone call from Dr. Karen A. Hacker, Director of the Allegheny County Health Department. She informed me that after consultation with the Centers for Disease Control, there are **NO CONFIRMED CASES of the Enterovirus D68, or EV-D68 in Southwest Pennsylvania.**

At the time we received the information earlier today, we believed it to be credible and we acted in good faith to send you the letter regarding what we believed was a potential health risk. We apologize for releasing incorrect information prematurely and that is why we are contacting you as soon as possible with updated and correct information.

In the future, should we receive information from the Allegheny County Health Department or the Centers for Disease Control that impacts our school district, we will continue to keep you apprised.

Thank you and have a good evening.

Sincerely,

Nancy Aloï Rose
Superintendent

MISSION

To lead an educational partnership with the community, maintaining an environment that challenges all students to reach their potential as lifelong learners and responsible members of society.
